

Cindy,

Thank you for the beautiful job you did redecorating our home this past spring. We are truly enjoying it all.

We have gone from a very cool environment to a warm and welcoming home. And speaking of warm... We have noticed a drastic difference in our home staying much cooler throughout the summer months with the installation of the wonderful top down bottom up energy efficient blinds you installed in our Living area and master bedroom. We were also pleasantly surprised to see how much warmer the house has been in these cold days thus far.

Can we schedule an appointment for you come and measure the windows for the rest of the house? We'd like to put the same blinds throughout our home in all the rest of the windows, if possible. We have noticed quite a bit of difference in heat/cold with the newer ones.

As you know the kitchen windows will be a challenge but we know you will have the answer.

Thank you for your recommendation and for passing on such an awesome savings and most of all for giving us a beautiful new space we are proud to call Home.

Sincerely,

Joyce and Chris
